Project

1. WorkFit

Nov 2022 - Dec 2022

This project builds a gym membership system application, in this project I work as a QA where I have the responsibility of testing on the gym membership application system. starting from building test plans and test cases, manual testing followed by automation testing, as well as bug report

- Tools : Trello, Katalon, Google sheets, Vysor, Postman, Github

2. Perpustakaan Esa Unggul

Feb 2022 - Apr 2022

This project is the final project of one of my courses, where my team and I built a library application, where this application can only be used by library admins to manage lending, returning books, and also member registration. This makes it easier for admins to manage book transactions.

- Tools : Html, Css, Javascript, Bootstrap
